6 June 1968

DD/S&T Staff Meeting
Thursday, 6 June '68

Deputy Director:

25X1A 1. Commented on the budget exercise just completed for the Executive Director. Money would almost certainly be tighter. How much is still a mystery. With regard to R&D he noted that HEW and Commerce allocated from 8 - 12 percent of their annual funding. [redacted] exercise reduction would be catastrophic and would cause a serious problem in the retention of good people. BOB was, of course, not just examining CIA R&D items. He noted that BOB had sent a position paper to DOD asking them to discuss such items as the cancellation of [redacted] transfer of IDEALIST to SAC, cancellation of TAGBOARD, and a delay in the 482 Program. He was sure that the IDEALIST transfer would be getting close scrutiny. BOB would not achieve a \$6 billion cut by eliminating nickels, dimes, and quarters. We must remember that this budget problem is not an anti-CIA exercise and that we at least have much company. It is not good to approach this problem with a chip on the shoulder. He suggested getting started on developing our position on the items BOB was asking DOD to discuss.

25X1A 2. On the IP/IP the cut is not likely to be great. When the dust settles the Director will likely go for the straight prorated percentage cut by Directorate. The DD will be briefing the Executive Director tomorrow on S&T's response to the budget cut exercise and will make it clear that a concentration on the R&D category would mean a reorganization of the Agency's whole intelligence program.

3. Noted that PFIAB has asked the Director to discuss the FTD briefing tomorrow.

4. Briefed on his recent trip to the Far East. He spent Monday through Thursday in [redacted] getting to know new senior officials. The idea was to keep [redacted] on track. It
